My Strengths

I am 35 years old with child like curiosity and inquisitiveness, I can be mentored very easily, I am always open to new ideas and I love to be educated about concepts, systems and procedures.

I can work in a cooperative and non-cooperative environment.

I will deliver results with limited resources in hand.

Good understanding of creative process in design i.e: Wireframes, UX, golden ratio, and grids etc.

Can learn and understand processes and the patterns involve in any complex problem.

Can empower, and assist people around me with the energy I carry along with me, I love to share what I know, and I always think that there is something I am not aware of so I am always seeking knowledge myself.

My tools of choice

Microsoft visual studio
Adobe Photoshop + Illustrator
Google
Microsoft Visio
Microsoft Office

Interests

Artificial Intelligence in the industry, security, education, cognitive sciences, people building and minimalism.

RECENTLY DELIVERED PROJECTS

2016 - 2019

Commercial division financial solution

It is a complete financial solution of payment and collection modules, which is a part of centralized invoicing system where we automated two whole departments from the commercial division, it is an integrated module with ERP, divided into three sub-modules - 1. Bill generation (Debit Note), Cheque collection (Exhibit-C), and a correction module (Corrector certificate). Developed in ASP.NET (Javascript) on the front and Oracle database in the backend. Developed using a bottom-up approach in a non-co-operative resisted to change environment.

Project status: Live and running

2009 - 2016

PNSC official website

Completely redesigned the official website at the beginning of 2009, and implemented it in the span of 2 weeks. In the year 2015 integrated the Urdu version of the website, where I myself translated the overall website's contents, I learned to type in Phonetic urdu during this era.

Project status: Live and running

Online career portal

A complete HR solution (cover areas from CV generation to Short-listing), implemented in a non-cooperative department using a bottom up approach, this application can be easily integrated with centralized ERP, this project also contains an online test taking module. Developed using ASP.NET + Angular JS in the front and SQL Server in the backend.

Project status: Live and running

2006 - 2009

PQA / PNSC invoicing application

BOQ based invoicing solution completed in year 2008, for automating manual excel based invoice generation, contains only the invoice generation module, made with ASP.NET in the front and SQL Server in the backend.

Project status: Live and running

ERP reporting Engine

Designed and developed a reporting engine of our centralized ERP for the management of PNSC. Developed using ASP.NET + JS in the front and SQL Server in the backend.

Project status: Live and running
