Maritime Commercial Solution

[Go Back](#) | [Retourner](#)

PROBLEM BRIEF:

A single instance desktop application built with Fox Pro. This project has the scope of a full fledged integrated solution that can cater all the needs of the commercial department of the respective shipping corporation.

SOLUTION PHASES

Built with a bottom up approach, we devised a partially integrated solution, with back-tracking and logging of every sort.

PQA / PNSC invoicing application

[Go Back](#) | [Retourner](#)

BOQ Dictionary Population

PROBLEM BRIEF:

Started in the year 2008, a Bill of quantities based invoicing initially with the idea of keeping everything in excel, which originally required a proper system to keep the data in a structured manner for which excel was not enough.

SOLUTION PHASES

Our solution is used from contract and boq creation at the time of competing in open bidding to invoice generation after winning it. Today it has been 12+ years since this system is operational and performing its role in bringing in the revenue to the corporation.
